COURT OF GENERAL SESSIONS-SEPT. 12.-Before Judge RUSSELL.
INDICTMENTS AGAINST THE SUNDAY LIQUOR SELLERS

After the orgaination of the Court, George Wilson, a young boy of 18, convicted on Friday of petit larceny, was first brought up for sentence and sent to the Penitentiary for six months, when the adjourned motion to quash the indictments pending against a large number of persons for selling liquor on Sunday came up for consideration.

Mr. D. B. Taylor appeared for the Liquor-Dealers' Assectation, with Mesers. J. B. Phillips and C. B. Tomlinson for individual parties among those indicted. Mr. Taylor, for the defendants, opened the argument, saying he had thoroughly examined the subject before him, and he apprehended counsel for the defendants would be able to present their views in a manner at once so brief and clear that the Court would find no embarrassment in reaching the conclusion at once to quash the first act that had ever been passed in this State making the saile of jintoxicating liquous a misdemeanor. It seemed that the history of regislation upon this subject had been of that characters that would naturally arouse a close investigation into any act that would naturally arouse a close investigation into any act that would naturally arouse a close investigation into any act that would naturally arouse a close investigation into any act that would naturally arouse a close investigation into any act that would naturally arouse a close investigation of the count of the constant of the count of the constant of the constant which was declared by the Gourt of Appeals to be unconstitutional. It was well known that that decision met with the approbation of all who were selected by it in this State, and with the general approval of an intelligent public. He consured the District Attorney) wounded the sensitive feelings of 10,000 repetable elities who were engaged in the liquor traffic in this city, by indicting 200 of them. He expressed the hope that the next Legislature would abolish that old feedal and decrept body, the Grand Iu-quest. The Recorder's views on the subject under discussion had unconsciously taken the form of a decision in the public mind. The speaker wondered what reason the District-Attorney would offer for bringing the certification whether the district action is the third. quest. The Recorder's views on the subject under discussion had unconsciously taken the form of a decision in the public mind. The speaker wondered what reason the District-Attorney would offer for bringing the certiorari before the Supreme Court neat week, and concluded by affirming that the indictments were worthless and should be discharged. Mr. Taylor induiged in many other remarks partaking largely of a personal induiged in many other remarks partaking largely of a personal character upon Mr. Hall, alluding to the time "when the sun would go down next November?" upon the close of the District-Attorney's official term, and, by implication, characterizing his zeal in prosecuting these indistments as an invitation for a remomination or reelection. The intimation was made in a manner quite offensive, and seemed about as little related to the real question before the Court as Mr. Taylor's general attack upon the policy of the law on which the indictments were found, or his still more irrelevant assault upon the Grand Jury system, characterizing it as a "secret inquisition," and as hostile to the "progressive spirit of the age."

Mr. Phillips followed for a portion of the defendants, remarking that be would confine himself exclusively to the law of the case. The following are his points, arguing that the indictments should be quashed:

1. The indictment is framed under the 21st section of the act to suppress intemperance and to regulate the sale of intoxicating liquers.

(a.) The 16th section prescribes and directs the mode of procedure for any violation of the provisions of the act, and abrogates, so far as these proceedings are concerned, the right of the Grand Jury ex mero mets to originate an indictment.

(b.) The sellog of hunor on Sunday, or on any other day, with or without license, was not an offense at common law. The statute is penal and in derogation of common law, and must be construed strictly.

(c.) The sening of rigidor on Sudany, on any observably was rewithout license, was not an offense at common law. The statute is pensi and in derogation of common law, and must be construed strictly.

(c.) If an offense not indictable at common law is prohibited by statute, and a particular method of proceeding is given by the statute, that method must be pursued, and it cannot be proceeded against by indictment, unless in the manner prescribed. (Whatton's Am. Cr. L., p. 92. Journey vs. State, I Missouri R., 304. Com vs. Howes, 15 Pickens R., 231.)

II. The act of 1855 gives to the Court of Special Sessions of this city exclusive jurisdiction in all cases of misdemeanor. In the cases now under consideration it is conceeded that there have been no arrests previous to indictment, and consequently no preliminary examinations—the defendants have not elected to be tried in the General Sessions, and this Court having no jurisdiction the indictment for this reason should be quashed.

III. The indictment is void and defective on its face, for the following reasons:

(a.) It is not an indictable offense under the Excise Law of 1857, for any person not licensed to sell liquor on any day of the week. The 15th section of the set prescribes a penalty of 450 for such offense, to recover which an action must be brought by the Commissioners of Excise.

(b.) The 1sts section, under which these indictments are framed, provides that "no inn tavern or hotel keeper, or person licensed to sell injuors, shall sell or give away any intexicating whese or liquors on Sunday."

(c.) Where an offense is cleated by statute, the Indictment must be drawn in reference to such statute; and where the words of the attaite, as in this instance, are descriptive of the offense, the indictment should follow the language of the statute; nothing can be taken by inference. (Wheston's Americant should be brought within all the material words of the statute; nothing can be taken by inference. (Wheston's Americant should be substituted. 299; Rusgles Shaw vs

For the above reasons on principle and authority, the motion to quash should be granted.

The District-Attorrey, Mr. Hall, followed Mr. Phillips, first taking notice of the personal remarks of Mr. Tayler, and his observations on the policy of excise laws and the system of Grand Jurise; and here Mr. Hall met his antagonist with admirable effect and spirit. Inasmuch as the gentleman had raised the question as to the policy of prohibiting the sale of liquors on Sunday, Mr. Hall took occasion to express his hearty concurrence, both as a man and as an officer, in the correct policy of that particular law, that it followed both the policy and morality of all ages, and that it was founded not only in eminent Christian propriety, but in the rudimental principles of political economy. Abrogate this law, said Mr Hall, and the Sabbath would inaugurate a saturnalla of crime and degradation. In Abrogate this law, said Mr Hail, and the Sabbath would inaugurate a saturnalia of crime and degradation. In reply to the sneer from Mr. Taylor about "fanaticism," Mr. Hail replied, there are two kinds of fanaticism, and while there is a fanaticism of temperance, there is also a fanaticism of intemperance. The true petition on this subject, and Mr. Hail, is "the golden mean" between narrow-minded radicalism on the one hand and licentious lawlessness on the other; and he said the particular law now assailed occupies this temperate and healthful medium. In answer to the charge preferred by Mr. Taylor that the District Attorney was remarkably industries in sitcharging his duty as the close of his official term approached, Mr. Rail said the approaching November election was nothing to him except as a member of a political party, and that he locked forward with gratitude to the time when he

could go back to the walts of his profession and to the beson his family. Under no droumstance, was he a conditiate for a effice. Mr. Tomlinson addressed the Court at considerable length, arguing that the late Excise law was opposed to the principles of our institutions, and repureant to the spirit of the Constitution. In reply to a statement made by the District Attorney, that in the Legislature the City of New-York was a nonentity, he said that without it the State would be a nonentity, he said that without it to State would be a nonentity. Judge Russell then took all the papers, and is expected to render his decision at an early day. The argument on this question continued from a little after 11 o'clock in the morning till 2½ p. m. Adjourned to Monday morning at 11 o'clock.

COMMERCIAL MATTERS.

SATURDAY, Sept. 12-P. M. The Stock market to-day was inactive and irregular, and a very large proportion of the transactions con-tinue to be for cash. The feature of the Board was the rise in Reading, which at the Second Board advanced to 49, having been 45 yesterday. It afterward closed at 47. Southern Michigan was steady in the morning at 21, but at the Second Board, after the transfer books were closed, it fell off to 18, power and certificate, with 18 bid for the opening. In other stocks the features of the market were much the same as yesterday, with a heavy feeling.

In Exchange there is but little doing, and rates are neminally as we have before noticed them.

Freights are again firmer with more offering. To Liverpool: 24,000 bush. Grain at 5d. for a relet bill, 5id. for Corn and Wheat in bulk and 6d. in bags; 780 bales Cotton at |d. @5-32d.; 5,300 bbls. Flour at 1s. 6d. To Glasgow: 20,000 bush. Grain at 8d. in shippers' bags, and Flour at 2s. 3d. To Rotterdam: 300 bbls. Spirits at 31d; 200 tuns Measurement Goods at 22s. 6d. w26s. To Hamburg: 100 tuns Iron at \$10 and 50 tuns Lead at \$7. A bark to River De La Platte with Lumber at \$16.

There is no important change in money to-day. The features are much the same as those noticed during the week-great stringency among the merchants and comparative case among the stock houses. The banks are, as a whole, contracting moderately, but in many cases are discounting as liberally as safety will allow. Private capitalists have done something toward supplying the vacuum occasioned by the withdrawal of bank loans, but in many cases they have, from an overmuch lack of confidence, locked up their funds, and refused to lend even on the best securities. This feeling, however, is wearing away. Mercantile paper continues to be passed at high rates-15@18 ₽ cent

for the best—but the demand is good.

The specie movement is active. Philadelphia and the West are taking some gold, while Boston and other portions of the interior continue to send to us.

One bank received \$75,000 to-day, and another \$45,000, &c. This movement will continue until the Exchanges become more settled. It has been a point of considerable discussion during the week, actual amount of the specie reserve in the City Banks, and it has generally been placed between \$12,000,000 and \$17,000,000. In order to settle this point, we have obtained from the banks the actual amount on hand at the opening of business this morning, and find it to be \$13,025,000 (thirteen millions and twenty-five thousand.) This is actual, excepting the case of a few banks, of which the average of last week was taken. This result is at least half a million better than we anticipated, and shows the banks with their reduced loans to be in a strong position. To this amount will be added in a day or two, a million and a half from California, bringing them up to \$14,500,000, while there is no prospect of an immediate resumption of

the foreign drain. The business of the Sub-Treasury was: Receipts \$109,328 23; Payments, \$210,476 60; Balance, \$10,-

The Philadelphia Ledger says:

"We regret to announce that the enterprising firm of Dawen & Hancock, shippers and importers of crockery, iron, &c., suspended payment yesterday. Beside a house here, they are largely connected with a house at New-York and another in London. The stoppage, we understand, was caused by the non-ful-fulfilln ent of engagements by a class of their creditors in the iron trade. The amount of their liabilities has not transpired, but from the extent of their business, employing seven large ships, they are probably large. There were one or two other reports of failures, but as they were not satisfactorily vouched for, the reports are probably incorrect."

OFFICE OF THE CLEVELAND AND TOLEDO

OFFICE OF THE CLEVELAND AND TOLEDO RAILROAD COMPANY, No. 18 William street, NEW-YORK, Sept. 12, 1857.

Sir: The intimation in The Herald that the Michigan Southern Railroad Company holds a claim against the Cleveland and Toledo Railroad Company is altogether erroneous. Not one dollar of any such claim exists.

J. B. Waring, President.

The last Bank of England statement shows the following variations as compared with the previous week:

The London News of the 29th of August thus notices the aspect of the market on the previous day:

The publication of further telegraphic advices, in anticipation of the Indian Mail, led to-day to a fresh fall of \(\frac{1}{2}\) to \(\frac{2}{2}\) per cent in the funds, from which there was no recovery up to the close of business. The item of intelligence upon which chief stress was laid is the boldness of the attack made by a very numerous force of the mutineers upon the garrison of Agra. The sales of to-day, however, seem to have been almost solely for account of discouraged speculators for the rise; no amount of real stock appears to have been thrown upon the market. Indeed, it is much more likely that the operations of the public will be on the side of investments, at the reduced prices. The important addition to the metallic stock of the Bank of England seems to have had little effect upon the stock markets this week; anxiety with reference to India overriding every other consideration.

The commercial demand for money continues active, in anticipation of the 4th of the month, and little or no business is done, even as regards first class bills, below the Bark minimum. In the Stock Exchange the rate for loans on Government securities remains at 4 to 44

Further parcels of gold, to the amount of £50,000, ex the steamer Great Britain, were to-day sent into the Bank. The total purchased by the establishment this week is nearly £500,000 sterling.

The steamer Baltic has arrived at Liverpool from New-York, with £168 200 in specie on freight. This supply, or at least such portion as is destined for this market, will probably reach London to-morrow. It is known that about £60,000 of it, consisting of American caples, has already been sold for exportation to the Centinent.

The market for bar silver is flat. Sales of some limited parcels tosk place to-day at 5s. ½d. 4° oz. standard, being ½d. below the price realized on Monday last for the supply ex. the Magdalena. Pending the receipt of the letters from the East, the orders to ship silver by the Indua, on the 4th of Sept., are comparatively limited, and it is expected that the total remittances by that vessel will be much less than those lately reported.

RAILROAD PROPERTY AND ITS VALUE. To the Editor of The N. Y. Tribuna.

Sir: Will you allow me a short space in your paper?

A writer, whose letter appeared in the issue of the 9th, says of railroads: " Not only has the original capital been sunk, but the creditors, except the first mortgage bondholders, of nearly every railroad in the Union have no security for their debts." That this is true of some roads no one will question. But the sweeping emphasis of the writer is due only to that panie which, like a brain fever, deranges the mental

Take a single instance—namely, the New-York Contral Railroad, which bears have depreciated by affirming that the " roadway is fast wearing out, and will

need soon to be created anew." To those living on the live of that road, and who, like myself, have constantly traveled over it from its first construction, no statement could be more absurd; for, to our experience, it is obvious and undeniable that by reason of new ballasting, new ties, new iron, and other improvements, the road is actually worth at this present time hundreds of thousands of dollars more than it was at the time of the consolidation. This fact is patent to every one who has been familiar

with the road from its origin.

The assaults made upon this road have led me to a more careful examination of the two last reports of the Directors, and in corroboration of what I have said, I there learn that in 1855 they expended out of the gross receipts of the traffic of the road, in maintaining the read-bed, \$836,562, and in 1856, \$1,130,429, and in repairs of machinery in the two years, \$1,656,089, making n all, \$3,623,080.

In 1856 they relaid, with new iron, 76 miles of their read, which would relay the whole road to Buffalo in

a little over seven years. In 1856 they had 21 engines, more than in 1855, and 240 more cars, and after paying all their expenses they had on hand at the time of the report a surplus of earnings since the consolidation, namely:

In all \$2,310,500 without any floating debt whatever.

What is true of this road is true, as I think, of many, not to say much the larger part of the others, na nely: they have been depreciated without any good cause, partly by interested persons, that they may profit thereby; but still more by causeless panic, leading holders of stocks to sacrifice their property from an idle fear that ruin was about to overtake their great interest. Canandaigua, Sept. 11, 1887.

Markets.. CAREFULLY REPORTED FOR THE TRIBUNE. ASHES—The demand for both kinds is limited, and the market is easier for Pearls; sales of 40 bbls. at \$7 00;. Pots are stready at \$7 37].
COTTON—The market is steady; sales to the extent of 400 bales are reported. We repeat quotatious;

avs at 164c.
FLOUR AND MEAL—The demand for Western Canal Flour

Maracaibo at 120 120; c. 100 Savanina it 120, and volvetame of Java & 160.

FLOUR AND MEAL—The demand for Western Caul Flour is more active, and the low grades are 500 00c, better, while the medium and better brands are heavy and slow of saie. The arrivals are liberal, and we notice more doing for export and the East, and the trade have purchased with rather more freedom. The sales are 9,000 bbbs, at \$5.372\$5.00 for common to good State; \$5.5002\$\$6.50 for extra do.; \$5.1502\$\$5.35 for superfine Indiana and Michigan \$5.5002\$\$6.15 for common to very good extra Ohio; \$6.202\$\$7.50 for very good to choice do.; \$6.208\$ for St. Louis brands, and \$6.802\$\$5.00 for extra Geneses. Canadian Flour is also better, the supply is fair and the demand good; sales of 1,000 bbls, at \$5.202\$\$6.00 for extra Geneses. Canadian Flour is also better, the supply is fair and the demand \$5.502\$\$7.10 for extra brands. Southern Flour is without important change, the receipts are not so large, and the inquiry is moderate; sales of 1,100 bbls, at \$5.502\$\$5.90 for mixed to good brands Baltimore, &c., and \$6.000\$\$7.20 for the better grades. Rye Flour is quiet; sales of 50 bbls at \$4.000\$\$5.

FISH—The continued stringency in money matters limitathe transactions in this as well as most branches of trade. In Dry Cod we notice a sele of 500 qtis poor quality Small Bant at \$3.620, but this is no criterion of the market; no large, good fish can be bought below \$1.25\$. Mackerel are dull and heavy, although no further decline is noticeable. Other kinds are quiet but trady.

GRAIN—A good supply of Wheat on the market, but much off it out of condition; this is lower and unsettled, while choice qualities are firm; the sales are 6,300 bush. Southern red at \$1.2702\$\$1.25; 400 bush. but the do at \$1.2702\$\$1.55; 3.000 bush. at \$1.25; 4.500 bush. but the do at \$1.2702\$\$1.55; 3.000 bush. at \$1.25; 4.500 bush. but the do at \$1.2702\$\$1.55; 3.000 bush. at \$1.25; 4.500 bush. hitted on the large color bush red Indiana at \$1.2002\$\$1.25; 4.500 bush. white do at \$1.2702\$

a market.

HOPS—The market continues quiet at 5:30% for 1256's. New are unchanged. We quote nominally at 13:41%.

HAY—The supply of new is large and the market tends downward; sales of 7:50 hales at 8:02% \$\pm\$ 100 fb.

1RON—Sectch Pig is not so much depressed, the recent large sales on speculation having somewhat relieved the market; the demand, however, is quite limited at \$\pm 2:30 \pm 9:0. months, for whole and small parcels from yard—the latter is an extreme price.

whole send small parcels from yard—the letter is an extreme price.

LEME_Rockland is steady but inactive at 75c, for Common, and \$1 05 for Lump.

MOLASSES continues neglected and dull; sales of 30 hids. Muscovado at 45c.

NAVAL STORES—Spirits Turpentine has again lapsed into a quiet, but there is now less pressing on the market and the downward tendency has been arrested; the rumored sale of 50c bbls alleded to yesterday by us was well founded, the price was 46jc, each; we do not learn of a single wnolesale trausaction to day, but holders generally are firm at the above rate and some 1,36 bbls, are going forward to Loudon from first hand; the recent foreign news is more favorable and a vessel has been chartered for the purpose of conveying the above quantity and 1,000 bbls, of Turpentine to London, this will greatly relieve the market, and were it not for the stringency in monetary similar, cause prices to advance. Crude is quiet but firm at \$4 13 1/2 ± 2375, the latter rate for selected Wilmington Rope.

OILS—Linseed is tractive, but prices are unchanged; sales of 7,000 gailor s American from crushers' hands at 792 50c. P gall, in casks; dealers probably may be induced to accept easier rates for each. English is duil and nominal; importers at present are not anxious to offer their stocks, unless for cash.
